

Care ideas for glasses from BOHEMIA

Glasses of crystal glass and soda-lime glass without coloured decoration are suitable for use in a dishwasher! However, the glasses should be washed only with a careful washing program of the machine and not more than 55°C. Please also note the manufacturer's data of the dishwasher.

It should be used mild washing-up liquids. This applies to rinse aid too. It is to be pointed out the hardness grade of the respective region and to balance accordingly with regeneration salt. Because of aggressive base and raised water hardness it can come to diffusions of the glass.

If you fill the dishwasher, please pay attention that the glasses don't lie to one another or touch other filling property. There is a risk that the glasses scratch during the rinse cycle.

Never give glasses with golden decoration in the dishwasher! Glasses with another coloured decoration only give in the dishwasher if it is marked on the product or on the packaging.

We recommend: wash high-quality glasses with little washing-up liquids via hand and afterwards dry with a soft cloth.

If you follow these care ideas, you will take much pleasure in a good glass from...
