

Interesting facts about the use of SIMAX glassware

-  Please wash all items before the first use.
-  Temperature changes - which are not shock-like (i. e. not directly from the freezer into the hot oven) - cannot affect SIMAX products. Cooling and freezing down to -40°C are no problem. When using the product, please handle it with care; pressure, impact or extreme temperature fluctuations may cause the product to break.
-  Don't put empty dishes on a heat source and don't put warm dishes on a cold or humid surface.
-  Never pour on cold fluid during cooking.
-  The glass vessels become hot! Please use oven cloth!
-  Please use the items only with food and don't store chemicals or the like in it.
-  Please heat the glass vessels only constantly and always with content.
-  Please use usual washing-up liquids for the cleaning, no raw cleaning materials like sand or steel-wool
-  Natural materials such as wood, cork or bamboo should not be washed in the dishwasher. The surfaces are damaged by the high temperatures (from 55°C), the material can swell or become stained. Clean therefore natural materials only with lukewarm water without washing-up liquids.
-  Blown items with a round bottom could directly put on an electric plate, if it is bigger than the bottom of the dishes. Therewith please mind that the glass ground area has to stand to 100% on the heat source.
-  There are some dishes with a suitable plastic lid. Therewith you can keep food and provisions in the refrigerator or freezer. Please remove the lid before cooking or heating on an electric plate or in the microwave. Also the items with a glass lid can be keep in the refrigerator or freezer.
